

## **NOVATEC SECURES FACEMASKS FOR DISTRIBUTION**

Hard to find quality face masks available for the non-medical community

Miami, Florida - April 20, 2020 - Novatec International Group, the global leader in instruments, medical and laboratory supplies, and reagent solutions has announced the availability of facemasks for the non-medical population, as the scientific community recommends their use when interacting in public within the near future.

The masks are manufactured are manufactured in a CE certified and FDA approved operator establishment. For verification purposes, Novatec is making available the operator number upon request. The factory complies with the CE standards and the facemasks are indeed an ideal option for those looking to lessen the risk of infection in a non-medical setting. (For a medical grade mask, an N95 is the gold standard.)

Novatec is pleased to distribute high quality facemasks for the general population and will continue to lead the way in supplying critical materials in times of crisis.
